Below this is a menu with categories: 'WHAT'S NEW', 'TOPS', 'BOTTOMS', 'SHOES', 'DENIM', 'DRESSES', 'ACCESSORIES', 'JEWELRY', and 'SAL'. The main content area features a large image of a woman with curly hair wearing a plaid vest over a red top and dark jeans, carrying a green bag. A red box with the text 'Cited Term' points to the woman's image. To the right of the image is a large white box with a handwritten note pinned to it. The note reads: 'Cozy Up to Fall', followed by a list: '1.) Must Haves', '2.) FAB New Shoes', '3.) Exotic Jewels', '4.) Amazing Handbags', and 'Shop Lulus'. Below the list, it says 'Free Shipping Over \$50'. At the bottom of the white box, it says 'We ♥ Myspace' and 'As Seen in...'. To the right of the white box, there is a vertical red banner that says 'End of Season Sale'. At the bottom of the page, there is a footer with links for 'contact us', 'about us', 'gift certificates', 'privacy policy', 'shipping & returns', 'help', 'press', 'email signup', 'Survey', 'Tell-a-friend', 'Affiliate Program', and '\$5 gift code when you sign up'. ## WHO ARE WE

Lulu Open Media sells software, support and solutions for deploying rich media applications on embedded devices and consumer electronics.

At the heart of our offering is the Lulu Media Player, a stable, open source all-purpose platform-independent media player based on the popular Gnash project. The player is backed up on the infrastructure side by the Lulu Media Server, an open source streaming media server based on Cygnal. To make it all work, we sell consulting, porting and support services so that you can deploy your solution with confidence.

## WHAT DO WE DO

Lulu Open Media is about ramping up the pace of digital media innovation, about enabling content creators and license owners to get their goods on the newest devices, about empowering consumers to use their media on their terms and about giving consumer electronics and embedded device manufacturers the code and tools they need to deploy any digital media type—no matter the license, no matter the codec, no matter the device.

We employ some of the world's foremost experts in open source development, rich media delivery, embedded systems engineering and application portability. We can assemble the right team to help deploy and support your solution.
